Language Skills: English, Tamil

EXPERIENCE

THE TEACHER APP   - WEB DEVELOPER   September 2023
- Translating UI-designs to full-stack features and pages.Implementing secure authorization and authentication.
- Collaborated with the content management team to identify outdated or incorrect resources, and initiated the process of updating and replacing them.
- Updated and maintained web pages to ensure the accuracy and relevancy of content and resources.
- Collaborated closely with the CEO to provide detailed bug reports and assist in implementing solutions.
- Conducted thorough and systematic debugging, utilizing various tools and techniques to identify the root causes of problems.Created Documentation.

PROJECTS

JOBLEAP   June 2023
- Developed a full-stack job application tracking application using **PostgreSQL**, **Express**, **React**, and **Node.js**.
- Users can effortlessly create personalized profiles and instantly access a curated list of job opportunities that align with their specific criteria. Seamlessly applying for jobs is made even easier as our integrated **ChatGPT API** dynamically modifies resumes based on individual requirements.
- Utilized **PostgreSQL** as the database system to securely store user profiles, job listings, and other relevant data, ensuring data integrity and efficient retrieval.
- Implemented **JWT** for secure authentication and authorization, protecting user accounts and sensitive information from unauthorized access.
- Enhanced the job search experience by offering refined search options such as location, date posted, schedule (full-time, part-time, internship), and onsite/remote options (on-site, remote, hybrid). Users can also filter job listings based on salary range.
- Integrated the **ChatGPT API** to generate a modified resume based on the job description, and users can easily compare and choose between the original and modified versions before submitting them for job applications.

INTERVIEW SCHEDULER   April 2023
- Created a **React-**based single-page application that allows students in the LightHouse Labs Web Development Bootcamp to effortlessly book and manage mentor interviews.
- Utilized Express on the back-end, integrating **PostgreSQL** database support from the scheduler-**api** to ensure seamless functionality and effective data management.
- Streamlined Interview Scheduling: Users can easily schedule interviews between noon and 5 pm on any day of the week. The app displays existing appointments for the chosen day and allows effortless switching between different days.
- Developed flexibility in Appointment Management allowing users to create, edit, and delete appointments; Confirmation prompts ensure safe appointment deletion and prevent accidental data loss.
- Tested using **Axios** for handling server requests and responses, and **Cypress** for comprehensive end-to-end testing, ensuring a bug-free and efficient user experience.

FOOD-PICKUP APP   March 2023
- Utilized **JavaScript, Express, EJS, jQuery, and Node.js** to create a user-friendly interface.The app utilizes **Twilio** to provide real-time updates to customers and restaurants about the status of their orders. Customers receive updates via SMS or phone calls, while restaurants can efficiently manage their orders using the app.
- Implemented real-time order tracking functionality on the website,leveraging **PostgreSQL** as database system to fetch and display the order-status data. Created database system using **PostgreSQL** to efficiently store and manage order information and other relevant data, ensuring smooth order processing and tracking.

EDUCATION

Lighthouse Labs   **June 2023**
Diploma in Web Development
Periyar University, Salem   **May 2020**
Bachelors in Biotechnology
